Proven impact on patient adherence

[New and unprecedented data published in the *Journal of Clinical Therapeutics*](#) finds Shellpak® provides statistically significant improvement in patient adherence over vials.

Pharmacy-friendly and efficient

Pre-filled medication packages help expedite pharmacist handling, reduce errors and save operational costs. And Shellpak® packages stack and store more efficiently than amber vials (standard orange pill bottles).

Child-resistant and senior-friendly

The rigid, plastic shells and proprietary, push-button technology earned Shellpak® the highest child resistance rating from the U.S. Consumer Product Safety Commission: F=1. Yet it remains easy for seniors to open.
