

Wockhardt Corporate Profile

Preparing for change before change beckons. Harnessing the power of innovative research. Providing high-quality medicines for a healthier world. This is our world at Wockhardt.

Founded in the early 1960's, Wockhardt is now a leading global pharmaceutical and biotechnology company that has a strong market presence in pharmaceuticals, biologics, nutrition products, vaccines, active pharmaceutical ingredients (APIs) and formulations which sell in over 90 countries across the globe.

A key growth driver at Wockhardt is its multi-disciplinary research capability backed by a team of 500 skilled scientists. Consistent efforts have resulted in six breakthrough biotechnology products, 250+ patent filings and a pipeline of promising new molecules. Wockhardt operates 15 world-class manufacturing plants in India, UK, Ireland, France and the US which have the approval of major regulatory bodies, including the US FDA and UK's MHRA. In addition to its development and manufacturing capabilities, Wockhardt owns and operates a chain of advanced super-specialty hospitals and clinical research facilities in India.

Wockhardt first tapped into the expanding US market in early 2004 with subsidiary Wockhardt USA, Inc. In addition, Wockhardt purchased US-based Morton Grove Pharmaceuticals in late 2007. Combined, these companies now deliver the most complete package of generic oral solids, liquids, topicals and injectables to the US market.
